

ADVANCED DIGITAL MEDIA SERVERS

S1Digital

The future of digital entertainment is right now...

S1Digital brings you the latest in digital home entertainment. Our Media Centers and Servers will amaze you with their high-fidelity video and audio quality. Whether you're watching high definition TV or movies, listening to your music collection, browsing your photos or streaming content throughout the house, you haven't seen anything like this before. Get rid of your cable box, Blu-ray, DVD & CD player and PC. One box replaces and seamlessly integrates them all with a single, intuitive interface.

S1Digital gives you an expandable platform that allows you to add capabilities as you need them. Start with a single room or equip your entire house. Add massive amounts of storage and hide it in the basement. Add touch screen controllers or use third party remote controls. S1Digital's Media Center ecosystem is limited only by your imagination.

Capture

- Watch and record up to four cable HDTV channels at the same time, including all your premium channels
- Get instant access to your entire music collection, including optional integration with iTunes™
- Easily edit your photos and watch them as a slide show set to music
- Transfer your videos and movies for watching at any time – no need to put the disc in every time
- Download movies, music and videos from the Internet

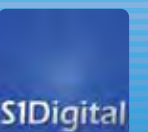

Centralize

- Store all your content on massive storage arrays (up to 32 terabytes on S1Digital Home Server storage solution)
- Protect your content from loss with built in redundancy
- Store your media centrally for access from anywhere

Distribute

- Watch live and recorded TV in different rooms, without the need for a cable box in each room
- Start watching a TV show in one room and continue watching it in another
- Listen to your music collection, videos, movies and photos
- Watch your HD movie and DVD collection from anywhere in the house
- Schedule TV recordings from over the Internet
- Control your Media Center and browse content from touchscreens throughout the house

High-definition TV. Movies. Music. Photos. It's Your Entertainment – your way.

1 Media Center

The hub of the digital home, the Media Center can capture, centralize and distribute digital content throughout the house. S1Digital ProLine Series solutions are designed specifically for the custom installer/CEDIA channel and can be integrated with third-party control and multi-zone audio distribution solutions. Quiet operation and custom design ensure a high level of customer satisfaction.

The S1Digital Digital Entertainment Platform and Media Center ecosystem is a powerful multi-room video and audio distribution solution which scales to meet your individual needs and budget - from one room to an entire house.

Start with a single Media Center. Then add Extenders to watch TV and videos or listen to music in other rooms. Media Center gives you complete control of your media from anywhere in your home, through remotes and touchscreens. Need more storage space? Add an Entertainment Server with up to 32 terabytes of storage.

These pages show just some of the ways the different solutions can work together to bring you the most complete digital entertainment experience available.

S1Digital

S1Digital ProLine Series solutions are available in living-room and rackmount form factors. ProLine Series Media Centers are powered by Intel Core 2 Duo and i7 CPUs, support 1080p HDMI, DVI and component video out, and digital or analog 5.1 and 7.1 channel audio.

Up to four CableCard tuners are supported for watching and recording HDTV.

The SoundPack option upgrades HDMI to version 1.3 enabling lossless audio decoding of DTS Master Audio and Dolby TrueHD audio from Blu-ray movies. SoundPack also upgrades 7.1 channel analog output with RCA jacks and Burr-Brown DACs.

3 Media Center Mini Edition

About the size of a book, the Media Center Mini Edition is a new generation of Media Center that strikes a balance between portability, space and power to deliver a digital theater experience anytime, anywhere. Example uses include:

- Playback of all of your Entertainment Server content, including movies, videos, and music. Great for any room where space is limited
- Optional cable HDTV streaming
- Supports high definition Blu-ray movie playback from disc or from server or another Media Center

4 Media Center Touchscreen Control

The Autonomic Controls Media Control Server software provides two way control of your Media Center and Extenders over a network or serial connection. Use touchscreens controllers from AMX, Crestron, HAI or RTI, or use any PC or UMPC to browse content from anywhere in your home and control all your music, movies, recorded television, videos, and photos.

5 Media Center Extender

Media Center Extenders allow you to extend all your media from your Media Center to other TVs throughout your house via either wired or wireless connection. Connect up to five Extenders to one Media Center. Media Center Extenders allow you to:

- Watch live and recorded HDTV, even resuming playback where it was last stopped
- Listen to your music collection
- Browse your photos and playback videos
- Access online IP TV, movie, music and other content streamed from the Internet

6 Xbox 360

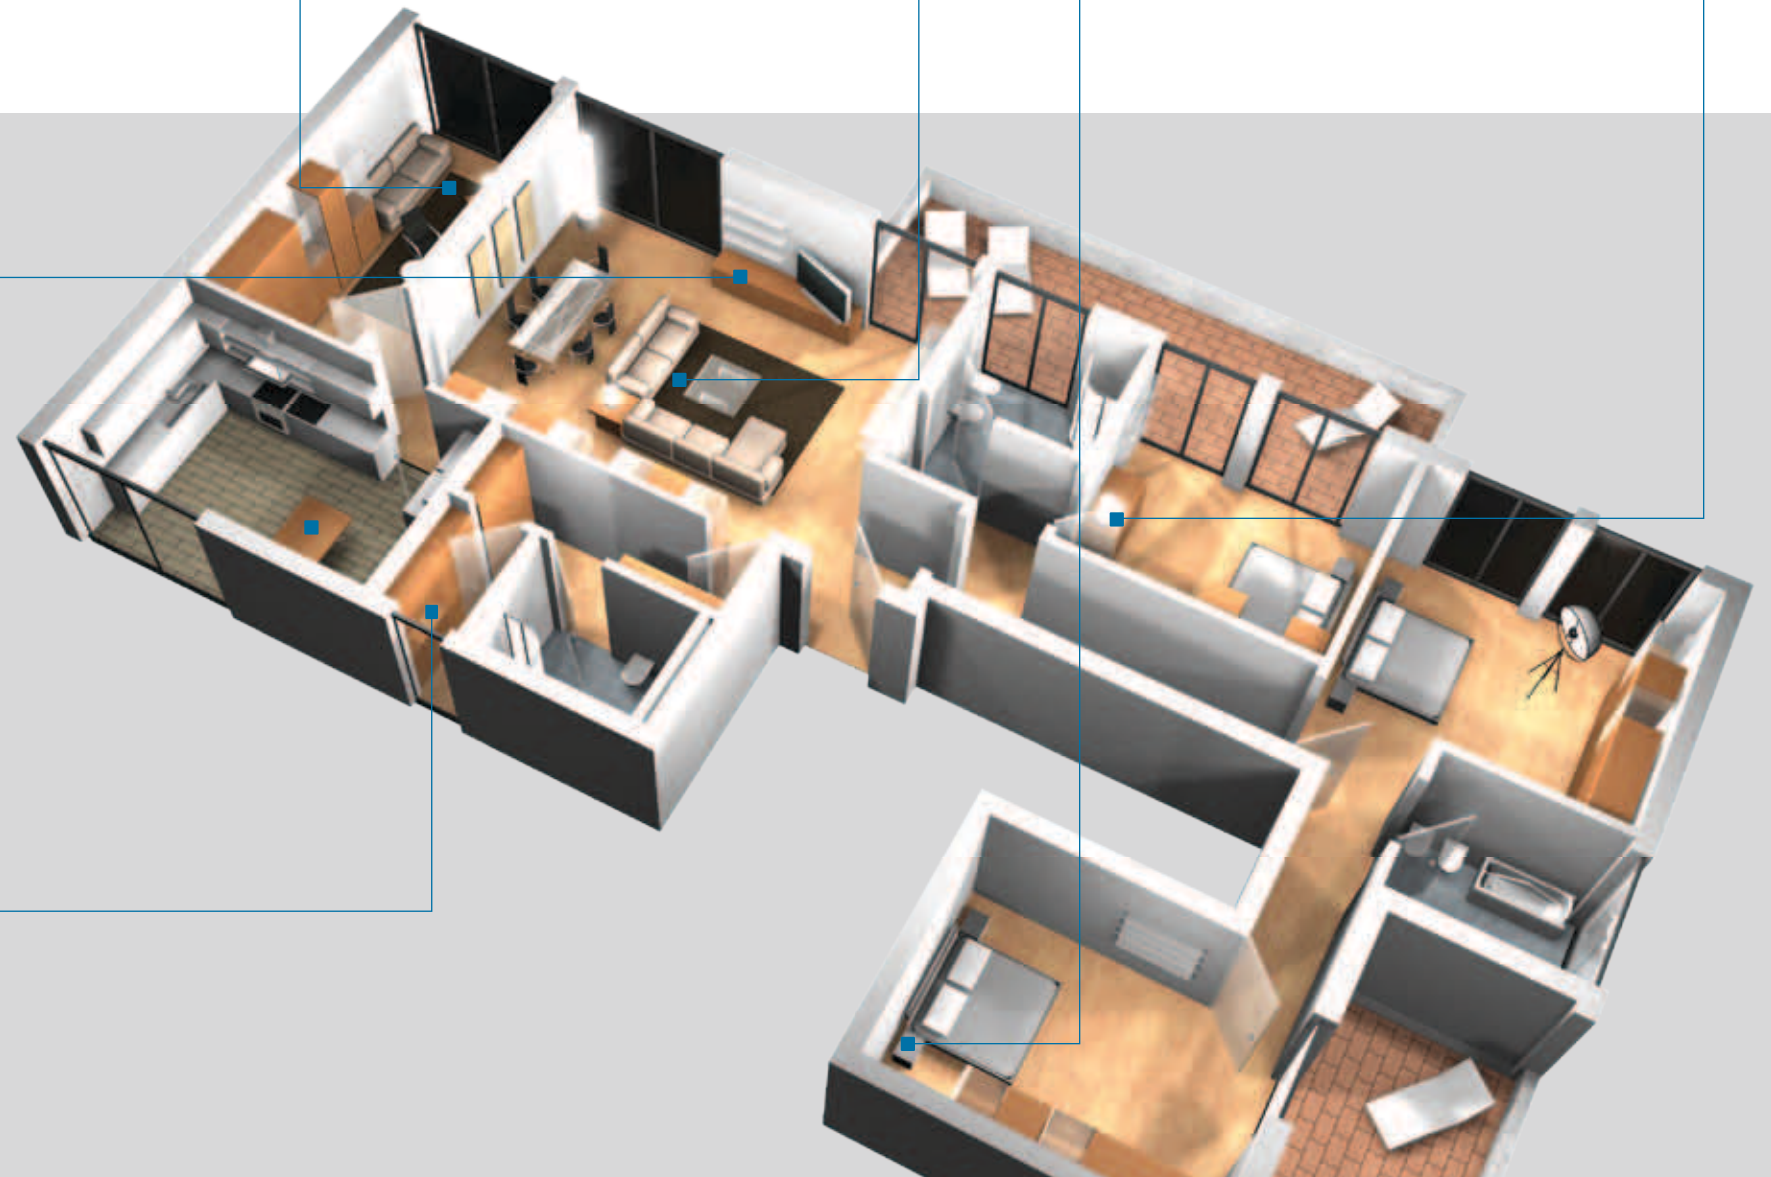

Not only does the Xbox 360 play the latest games in high-definition, but it's also a Media Center Extender! Access all the content stored on your Media Center or Windows Home Server throughout the house, including live HDTV, without the need for a cable box. Plus the Xbox 360 also plays HD-DVD discs.

2 Entertainment Server

The Entertainment Server is a powerful, rackmount server that can capture, store and distribute HD movies, HD television, music, photos, videos and more. The ES series can distribute multiple streams of content around the house over IP network, including the ability to stream live Cable TV to clients.

- Quiet, custom designed 3U rack chassis
- Available in 16 and 32 terabyte configurations
- Built in Blu-ray drive, optional 100 disc Blu-ray changer
- Automatically retrieves cover-art and metadata for HD movies and music CDs
- TV Server capability - stream live HD cable to Media Center clients over network (Network TV add on)
- Built in redundancy means no data loss if drive fails
- Backup Media Centers as well as other PCs on network
- Powered by Windows Home Server

S1Digital puts you in control of your content - check these out.

HD Television

S1Digital Media Centers offer a simple, but powerful way to watch and record HDTV. Advanced features include a free Electronic Program Guide (EPG), plus search and movie finder services. Media Center supports up to four CableCARD Digital Cable Tuners for direct connection to your cable TV service, without the need for a set-top box. Watch and record up to four premium HDTV channels simultaneously, such as HBO-HD, ESPN-HD, Discovery-HD, Showtime – all your subscribed channels are available. In addition, Media Center also supports unencrypted QAM and ATSC (over the air) HDTV signals.

HD Movies

Play the latest Blu-ray movies with support for Profile 2.0 and BD-Live. Watch DVDs with upscaled video quality. Archive and playback movies directly from the hard drive and around the house. Skip through chapters, display track titles, and enjoy the clarity offered by 1080p playback via HDMI. And with the optional SoundPack upgrade, listen to high-def movies in lossless 7.1 channel audio with DTS Master Audio and Dolby TrueHD bitstreaming.

Photos

It's easy to view your photo collections on the big screen. Makes slide shows fun and interesting again. Sort by folder, date or title. Import photos from digital cameras or memory cards without hassle and instantly view as a slideshow, complete with music soundtrack and smooth zoom effects. Enhanced photo editing technology makes it easy to rotate, crop, and fix color on photos. Then print directly or share photos online.

Music

With direct access to your entire personal and online music collection it's never been easier to play a CD, copy it into your library, create a playlist on the fly, or edit album details. Browse and search by album cover or artist, genre, date or individual songs. Place a CD into the Media Center and it will automatically download cover art, track and artist information. Built-in support for Audio CD burning is also included. Want more music? Listen and download music from online music sites including XM Radio and integrate with your existing iTunes™ music store (with optional add on).

Online Media

Want to watch a movie or listen to music but don't have that disc? No problem. Media Center provides access to a wide range of Internet based music, movie, and radio providers, plus on-demand and information services offering instant access to customized sports, news, and entertainment programming. Regularly updated with new and exciting content providers, Online Media is your link to additional digital media products and services by third parties.

OUR PARTNERS

About S1Digital

S1Digital, LLC, a leader in the Media Center market since 2004, is passionate about bringing you the latest advances in digital entertainment technology and has grown to become a trusted Media Center brand. Recognized by Microsoft as an innovator in its field, S1Digital is a Microsoft Direct OEM and Gold Partner.

The Company is based in New Jersey with a dealer network across the continental United States.

Why S1Digital?

S1Digital's Media Centers are powered by the latest Intel hardware platforms and run on Microsoft operating systems. High quality video processing is enabled by ATI AVIVO, Nvidia PureVideo and Intel HD Video GPUs and technologies. Dedicated to on-going R&D, we are continually working with our partners to offer customers best-in-class solutions.

S1Digital is proud to be able to offer one of the highest levels of customer service in our market. We have a dedicated support team that understands both the technology behind Media Center as well as traditional audio and video solutions. Our sales and support teams are among the few that truly understand how to help customers manage the convergence between old and new technologies.

S1Digital offers free lifetime telephone and email support for our products and we have some pretty cool tools to help diagnose any problems that may arise.
